# ARTICLE

of transaction, reported by the payment service provider and calculated in accordance with Article 19, is equivalent to or below the reference fraud rates specified in the table set out in the Annex for remote electronic card-based payments and remote electronic credit transfers respectively;

the amount of the transaction does not exceed the relevant exemption threshold value (ETV) specified in the table set out in the Annex;

payment service providers as a result of performing a real time risk analysis have not identified any of the following:

- abnormal spending or behavioural pattern of the payer;
- unusual information about the payer's device/software access;
- malware infection in any session of the authentication procedure;
- known fraud scenario in the provision of payment services;
- abnormal location of the payer;
- high-risk location of the payee.

Payment service providers that intend to exempt electronic remote payment transactions from strong customer authentication on the ground that they pose a low risk shall take into account at a minimum, the following risk-based factors:

- the previous spending patterns of the individual payment service user;
- the payment transaction history of each of the payment service provider's payment service users;
- the location of the payer and of the payee at the time of the payment transaction in cases where the access device or the software is provided by the payment service provider;
- the identification of abnormal payment patterns of the payment service user in relation to the user's payment transaction history.

The assessment made by a payment service provider shall combine all those risk-based factors into a risk scoring for each individual transaction to determine whether a specific payment should be allowed without strong customer authentication.

Transaction risk analysis

Article 18

For each type of transaction referred to in the table set out in the Annex, the payment service provider shall ensure that the overall fraud rates covering both payment transactions authenticated through strong customer authentication and those executed under any of the exemptions referred to in Articles 13 to 18 are equivalent to, or lower than, the reference fraud rate for the same type of payment transaction indicated in the table set out in the Annex.

The overall fraud rate for each type of transaction shall be calculated as the total value of unauthorised or fraudulent remote transactions, whether the funds have been recovered or not, divided by the total value of all remote transactions for the same type of transactions, whether authenticated with the application of strong customer authentication or executed under any exemption referred to in Articles 13 to 18 on a rolling quarterly basis (90 days).

The calculation of the fraud rates and resulting figures shall be assessed by the audit review referred to in Article 3(2), which shall ensure that they are complete and accurate.

The methodology and any model, used by the payment service provider to calculate the fraud rates, as well as the fraud rates themselves, shall be adequately documented and made fully available to competent authorities and to EBA, with prior notification to the relevant competent authority(ies), upon their request.

Calculation of fraud rates

Article 19

Payment service providers that make use of the exemption referred to in Article 18 shall immediately report to the competent authorities where one of their monitored fraud rates, for any type of payment transactions indicated in the table set out in the Annex, exceeds the applicable reference fraud rate and shall provide to the

	<p>competent authorities a description of the measures that they intend to adopt to restore compliance of their monitored fraud rate with the applicable reference fraud rates.</p> <p>Payment service providers shall immediately cease to make use of the exemption referred to in Article 18 for any type of payment transactions indicated in the table set out in the Annex in the specific exemption threshold range where their monitored fraud rate exceeds for two consecutive quarters the reference fraud rate applicable for that payment instrument or type of payment transaction in that exemption threshold range.</p> <p>Following the cessation of the exemption referred to in Article 18 in accordance with paragraph 2 of this Article, payment service providers shall not use that exemption again, until their calculated fraud rate equals to, or is below, the reference fraud rates applicable for that type of payment transaction in that exemption threshold range for one quarter.</p> <p>Where payment service providers intend to make use again of the exemption referred to in Article 18, they shall notify the competent authorities in a reasonable timeframe and shall before making use again of the exemption, provide evidence of the restoration of compliance of their monitored fraud rate with the applicable reference fraud rate for that exemption threshold range in accordance with paragraph 3 of this Article.</p>	Cessation of exemptions based on transaction risk analysis	Article 20
	<p>In order to make use of the exemptions set out in Articles 10 to 18, payment service providers shall record and monitor the following data for each type of payment transactions, with a breakdown for both remote and non-remote payment transactions, at least on a quarterly basis:</p> <ul style="list-style-type: none"> <li>the total value of unauthorised or fraudulent payment transactions in accordance with Article 64(2) of Directive (EU) 2015/2366, the total value of all payment transactions and the resulting fraud rate, including a breakdown of payment transactions initiated through strong customer authentication and under each of the exemptions;</li> <li>the average transaction value, including a breakdown of payment transactions initiated through strong customer authentication and under each of the exemptions;</li> <li>the number of payment transactions where each of the exemptions was applied and their percentage in respect of the total number of payment transactions.</li> </ul> <p>Payment service providers shall make the results of the monitoring in accordance with paragraph 1 available to competent authorities and to EBA, with prior notification to the relevant competent authority(ies), upon their request.</p>	Monitoring	Article 21

	<p>Payment service providers shall ensure the confidentiality and integrity of the personalised security credentials of the payment service user, including authentication codes, during all phases of the authentication.</p> <p>For the purpose of paragraph 1, payment service providers shall ensure that each of the following requirements is met:</p> <ul style="list-style-type: none"> <li>personalised security credentials are masked when displayed and are not readable in their full extent when input by the payment service user during the authentication;</li> <li>personalised security credentials in data format, as well as cryptographic materials related to the encryption of the personalised security</li> </ul>	General requirements	Article 22

# ARTICLE

credentials are not stored in plain text;

- secret cryptographic material is protected from unauthorised disclosure.

Payment service providers shall fully document the process related to the management of cryptographic material used to encrypt or otherwise render unreadable the personalised security credentials.

Payment service providers shall ensure that the processing and routing of personalised security credentials and of the authentication codes generated in accordance with Chapter II take place in secure environments in accordance with strong and widely recognised industry standards.

Payment service providers shall ensure that the creation of personalised security credentials is performed in a secure environment.

They shall mitigate the risks of unauthorised use of the personalised security credentials and of the authentication devices and software following their loss, theft or copying before their delivery to the payer.

Creation and transmission of credentials

Article 23

Payment service providers shall ensure that only the payment service user is associated, in a secure manner, with the personalised security credentials, the authentication devices and the software.

For the purpose of paragraph 1, payment service providers shall ensure that each of the following requirements is met:

- the association of the

payment service user's identity with personalised security credentials, authentication devices and software is carried out in secure environments under the payment service provider's responsibility comprising at least the payment service provider's premises, the internet environment provided by the payment service provider or other similar secure websites used by the payment service provider and its automated teller machine services, and taking into account risks associated with devices and underlying components used during the association process that are not under the responsibility of the payment service provider;
- the association by means of a remote channel of the payment service user's identity with the personalised security credentials and with authentication devices or software is performed using strong customer authentication.

Association with the payment service user

Article 24

Payment service providers shall ensure that the delivery of personalised security credentials, authentication devices and software to the payment service user is carried out in a secure manner designed to address the risks related to their unauthorised use due to their loss, theft or copying.

For the purpose of paragraph 1, payment service providers shall at least apply each of the following measures:

- effective and secure delivery mechanisms ensuring that the personalised security credentials, authentication devices and software are delivered to the legitimate payment service user;
- mechanisms that allow the payment service provider to verify the authenticity of the authentication software delivered to the payment services user by means of the internet;
- arrangements ensuring that, where the delivery of personalised security credentials is executed outside the premises of the payment service provider or through a remote channel:

- no unauthorised party can obtain more than one feature of the personalised security credentials, the authentication devices or software when delivered through the same channel;
- the delivered personalised security credentials, authentication

Delivery of credentials, authentication devices and software

<p>Account servicing payment service providers that offer to a payer a payment account that is accessible online shall have in place at least one interface which meets each of the following requirements:</p> <ul style="list-style-type: none"><li>account information service providers, payment initiation service providers and payment service providers issuing card-based payment instruments are able to identify themselves towards the account servicing payment service provider;</li><li>account information service providers are able to communicate securely to request and receive information on one or more designated payment accounts and associated payment transactions;</li><li>payment initiation service providers are able to communicate securely to initiate a payment order from the payer's payment account and receive all information on the initiation of the payment transaction and all information accessible to the account servicing payment service providers regarding the execution of the payment transaction.</li></ul> <p>For</p>		

DOCUMENT SECTION

the purposes of authentication of the payment service user, the interface referred to in paragraph 1 shall allow account information service providers and payment initiation service providers to rely on all the authentication procedures provided by the account servicing payment service provider to the payment service user.

The interface shall at least meet all of the following requirements:

- a payment initiation service provider or an account information service provider shall be able to instruct the account servicing payment service provider to start the authentication based on the consent of the payment service user;
- communication sessions between the account servicing payment service provider, the account information service provider, the payment initiation service provider and any payment service user concerned shall be established and maintained throughout the authentication;
- the integrity and confidentiality of the personalised security credentials and of authentication codes transmitted by or through the payment initiation service provider or the account information service provider shall be ensured.
- Account servicing payment service providers shall ensure that their interfaces follow standards of communication which are issued by international or European standardisation organisations.

Account servicing payment service providers shall also ensure that the technical specification of any of the interfaces is documented specifying a set of routines, protocols, and tools needed by payment initiation service providers, account information service providers and payment service providers issuing card-based payment instruments for allowing their software and applications to

applications to interoperate with the systems of the account servicing payment service providers.<br>Account servicing payment service providers shall at a minimum, and no less than 6 months before the application date referred to in Article 38(2), or before the target date for the market launch of the access interface when the launch takes place after the date referred to in Article 38(2), make the documentation available, at no charge, upon request by authorised payment initiation service providers, account information service providers and payment service providers issuing card-based payment instruments or payment service providers that have applied to their competent authorities for the relevant authorisation, and shall make a summary of the documentation publicly available on their website.</li> <li>In addition to paragraph 3, account servicing payment service providers shall ensure that, except for emergency situations, any change to the technical specification of their interface is made available to authorised payment initiation service providers, account information service providers and payment service providers issuing card-based payment instruments, or payment service providers that have applied to their competent authorities for the relevant authorisation, in advance as soon as possible and not less than 3 months before the change is implemented.<br>Payment service providers shall document emergency situations where changes were implemented and make the documentation available to competent authorities on request.</li> <li>Account servicing payment service providers shall make available a testing facility, including support, for connection and functional testing to enable authorised payment initiation service providers, payment service providers issuing card-based payment instruments and account information service providers, or

General obligations for access interfaces Article 30

payment service providers that have applied for the relevant authorisation, to test their software and applications used for offering a payment service to users. This testing facility should be made available no later than 6 months before the application date referred to in Article 38(2) or before the target date for the market launch of the access interface when the launch takes place after the date referred to in Article 38(2).<br>However, no sensitive information shall be shared through the testing facility.</li><li>Competent authorities shall ensure that account servicing payment service providers comply at all times with the obligations included in these standards in relation to the interface(s) that they put in place. In the event that an account servicing payment services provider fails to comply with the requirements for interfaces laid down in these standards, competent authorities shall ensure that the provision of payment initiation services and account information services is not prevented or disrupted to the extent that the respective providers of such services comply with the conditions defined under Article 33(5).</li> </ol>

<div class="crrArticle">Account servicing payment service providers shall establish the interface(s) referred to in Article 30 by means of a dedicated interface or by allowing the use by the payment service providers referred to in Article 30(1) of the interfaces used for authentication and communication with the account servicing payment service provider's payment services users.</div>

Access  
interface  
options

Article  
31

<ol class="crrNumList"><li>Subject to compliance with Article 30 and 31, account servicing payment service providers that have put in place a dedicated interface shall ensure that the dedicated interface offers at all times the same level of availability and performance, including support, as the interfaces made available to the

		<p>payment service user for directly accessing its payment account online.</p> <p>Account servicing payment service providers that have put in place a dedicated interface shall define transparent key performance indicators and service level targets, at least as stringent as those set for the interface used by their payment service users both in terms of availability and of data provided in accordance with Article 36. Those interfaces, indicators and targets shall be monitored by the competent authorities and stress-tested.</p> <p>Account servicing payment service providers that have put in place a dedicated interface shall ensure that this interface does not create obstacles to the provision of payment initiation and account information services. Such obstacles, may include, among others, preventing the use by payment service providers referred to in Article 30(1) of the credentials issued by account servicing payment service providers to their customers, imposing redirection to the account servicing payment service provider's authentication or other functions, requiring additional authorisations and registrations in addition to those provided for in Articles 11, 14 and 15 of Directive (EU) 2015/2366, or requiring additional checks of the consent given by payment service users to providers of payment initiation and account information services.</p> <p>For the purpose of paragraphs 1 and 2, account servicing payment service providers shall monitor the availability and performance of the dedicated interface. Account servicing payment service providers shall publish on their website quarterly statistics on the availability and performance of the dedicated interface and of the interface used by its payment service users.</p>		
		<p>Account servicing payment service providers shall ensure that this interface does not create obstacles to the provision of payment initiation and account information services. Such obstacles, may include, among others, preventing the use by payment service providers referred to in Article 30(1) of the credentials issued by account servicing payment service providers to their customers, imposing redirection to the account servicing payment service provider's authentication or other functions, requiring additional authorisations and registrations in addition to those provided for in Articles 11, 14 and 15 of Directive (EU) 2015/2366, or requiring additional checks of the consent given by payment service users to providers of payment initiation and account information services.</p> <p>For the purpose of paragraphs 1 and 2, account servicing payment service providers shall monitor the availability and performance of the dedicated interface. Account servicing payment service providers shall publish on their website quarterly statistics on the availability and performance of the dedicated interface and of the interface used by its payment service users.</p>	Obligations for a dedicated interface	Article 32
		<p>Account servicing payment service providers shall ensure that this interface does not create obstacles to the provision of payment initiation and account information services. Such obstacles, may include, among others, preventing the use by payment service providers referred to in Article 30(1) of the credentials issued by account servicing payment service providers to their customers, imposing redirection to the account servicing payment service provider's authentication or other functions, requiring additional authorisations and registrations in addition to those provided for in Articles 11, 14 and 15 of Directive (EU) 2015/2366, or requiring additional checks of the consent given by payment service users to providers of payment initiation and account information services.</p> <p>For the purpose of paragraphs 1 and 2, account servicing payment service providers shall monitor the availability and performance of the dedicated interface. Account servicing payment service providers shall publish on their website quarterly statistics on the availability and performance of the dedicated interface and of the interface used by its payment service users.</p>		

## SECTION

shall include, in the design of the dedicated interface, a strategy and plans for contingency measures for the event that the interface does not perform in compliance with Article 32, that there is unplanned unavailability of the interface and that there is a systems breakdown.

Unplanned unavailability or a systems breakdown may be presumed to have arisen when five consecutive requests for access to information for the provision of payment initiation services or account information services are not replied to within 30 seconds.

Contingency measures shall include

communication plans to inform payment service providers making use of the dedicated interface of measures to restore the system and a description of the immediately available alternative options payment service providers may have during this time.

Both the account servicing payment service provider and the payment service providers referred to in Article 30(1) shall report problems with dedicated interfaces as described in paragraph 1 to their respective competent national authorities without delay.

As part of a contingency mechanism, payment service providers referred to in Article 30(1) shall be allowed to make use of the interfaces made available to the payment service users for the authentication and communication with their account servicing payment service provider, until the dedicated interface is restored to the level of availability and performance provided for in Article 32.

For this purpose,

account servicing payment service providers shall ensure that the payment service providers referred to in Article 30(1) can be identified and can rely on the authentication procedures provided by the account servicing payment service provider to the payment service user. Where the payment service providers referred

to in Article 30(1) make use of the interface referred to in paragraph 4 they shall:

- take the necessary measures to ensure that they do not access, store or process data for purposes other than for the provision of the service as requested by the payment service user;
- continue to comply with the obligations following from Article 66(3) and Article 67(2) of Directive (EU) 2015/2366 respectively;
- log the data that are accessed through the interface operated by the account servicing payment service provider for its payment service users, and provide, upon request and without undue delay, the log files to their competent national authority;
- duly justify to their competent national authority, upon request and without undue delay, the use of the interface made available to the payment service users for directly accessing its payment account online;
- inform the account servicing payment service provider accordingly.

Competent authorities, after consulting EBA to ensure a consistent application of the following conditions, shall exempt the account servicing payment service providers that have opted for a dedicated interface from the obligation to set up the contingency mechanism described under paragraph 4 where the dedicated interface meets all of the following conditions:

- it complies with all the obligations for dedicated interfaces as set out in Article 32;
- it has been designed and tested in accordance with Article 30(5) to the satisfaction of the payment service providers referred to therein;
- it has been widely used for at least 3 months by payment service providers to offer account information services, payment initiation services and to provide confirmation on the availability of funds for card-based payments;
- any problem related to

Contingency measures for a dedicated interface

Article 33

Specific requirements for the common and secure open standards of communication

Section 2

the dedicated interface has been resolved without undue delay.

Competent authorities shall revoke the exemption referred to in paragraph 6 where the conditions (a) and (d) are not met by the account servicing payment service providers for more than 2 consecutive calendar weeks. Competent authorities shall inform EBA of this revocation and shall ensure that the account servicing payment service provider establishes, within the shortest possible time and at the latest within 2 months, the contingency mechanism referred to in paragraph 4.

For the purpose of identification, as referred to in Article 30(1)(a), payment service providers shall rely on qualified certificates for electronic seals as referred to in Article 3(30) of Regulation (EU) No 910/2014 or for website authentication as referred to in Article 3(39) of that Regulation.

For the purpose of this Regulation, the registration number as referred to in the official records in accordance with Annex III (c) or Annex IV (c) to Regulation (EU) No 910/2014 shall be the authorisation number of the payment service provider issuing card-based payment instruments, the account information service providers and payment initiation service providers, including account servicing payment service providers providing such services, available in the public register of the home Member State pursuant to Article 14 of Directive (EU) 2015/2366 or resulting from the notifications of every authorisation granted under Article 8 of Directive 2013/36/EU of the European Parliament and of the Council Directive 2013/36/EU of the European Parliament and of the Council of 26 June 2013 on access to the activity of credit institutions and the prudential supervision of credit institutions and investment firms, amending Directive

Certificates

Article  
34

amending Directive 2002/87/EC and repealing Directives 2006/48/EC and 2006/49/EC (OJ L 176, 27.6.2013, p. 338). in accordance with Article 20 of that Directive.

For the purposes of this Regulation, qualified certificates for electronic seals or for website authentication referred to in paragraph 1 shall include, in a language customary in the sphere of international finance, additional specific attributes in relation to each of the following:

- the role of the payment service provider, which maybe one or more of the following:
  - account servicing;
  - payment initiation;
  - account information;
  - issuing of card-based payment instruments;
- the name of the competent authorities where the payment service provider is registered.

The attributes referred to in paragraph 3 shall not affect the interoperability and recognition of qualified certificates for electronic seals or website authentication.

- Account servicing payment service providers, payment service providers issuing card-based payment instruments, account information service providers and payment initiation service providers shall ensure that, when exchanging data by means of the internet, secure encryption is applied between the communicating parties throughout the respective communication session in order to safeguard the confidentiality and the integrity of the data, using strong and widely recognised encryption techniques.
- Payment service providers issuing card-based payment instruments, account information service providers and payment initiation service providers shall keep the access sessions offered by account servicing payment service providers as short

as possible and they shall actively terminate any such session as soon as the requested action has been completed.

When maintaining parallel network sessions with the account servicing payment service provider, account information service providers and payment initiation service providers shall ensure that those sessions are securely linked to relevant sessions established with the payment service user(s) in order to prevent the possibility that any message or information communicated between them could be misrouted.

Account information service providers, payment initiation service providers and payment service providers issuing card-based payment instruments with the account servicing payment service provider shall contain unambiguous references to each of the following items:

- the payment service user or users and the corresponding communication session in order to distinguish several requests from the same payment service user or users;
- for payment initiation services, the uniquely identified payment transaction initiated;
- for confirmation on the availability of funds, the uniquely identified request related to the amount necessary for the execution of the card-based payment transaction.

Account servicing payment service providers, account information service providers, payment initiation service providers and payment service providers issuing card-based payment instruments shall ensure that where they communicate personalised security credentials and authentication codes, these are not readable, directly or indirectly, by any staff at any time.

In case of loss of confidentiality of personalised security credentials under their sphere of competence,

Security of communication session

Article 35

those providers shall inform without undue delay the payment services user associated with them and the issuer of the personalised security credentials.

Account servicing payment service providers shall comply with each of the following requirements:

- they shall provide account information service providers with the same information from designated payment accounts and associated payment transactions made available to the payment service user when directly requesting access to the account information, provided that this information does not include sensitive payment data;
- they shall, immediately after receipt of the payment order, provide payment initiation service providers with the same information on the initiation and execution of the payment transaction provided or made available to the payment service user when the transaction is initiated directly by the latter;
- they shall, upon request, immediately provide payment service providers with a confirmation in a simple yes or no format, whether the amount necessary for the execution of a payment transaction is available on the payment account of the payer.
- In case of an unexpected event or error occurring during the process of identification, authentication, or the exchange of the data elements, the account servicing payment service provider shall send a notification message to the payment initiation service provider or the account information service provider and the payment service provider issuing card-based payment instruments which explains the reason for the unexpected event or error.

Where the account servicing payment service provider offers a dedicated interface in accordance with Article 32, the interface shall provide for notification messages

Data  
exchanges

Article  
36

	<p>communication messages concerning unexpected events or errors to be communicated by any payment service provider that detects the event or error to the other payment service providers participating in the communication session.</p> <p>&lt;/li&gt; &lt;li&gt;Account information service providers shall have in place suitable and effective mechanisms that prevent access to information other than from designated payment accounts and associated payment transactions, in accordance with the user's explicit consent.&lt;/li&gt;</p> <p>&lt;li&gt;Payment initiation service providers shall provide account servicing payment service providers with the same information as requested from the payment service user when initiating the payment transaction directly.&lt;/li&gt;</p> <p>&lt;li&gt; &lt;p&gt;Account information service providers shall be able to access information from designated payment accounts and associated payment transactions held by account servicing payment service providers for the purposes of performing the account information service in either of the following circumstances:&lt;/p&gt; &lt;ol class="crrCharList"&gt;</p> <p>&lt;li&gt;whenever the payment service user is actively requesting such information;&lt;/li&gt;</p> <p>&lt;li&gt;where the payment service user does not actively request such information, no more than four times in a 24-hour period, unless a higher frequency is agreed between the account information service provider and the account servicing payment service provider, with the payment service user's consent.&lt;/li&gt; &lt;/ol&gt; &lt;/li&gt; &lt;/ol&gt;</p>
